

DRAFT Vision and Goals

Vision

An inclusive and equitable multimodal transportation network that provides safe, well connected mobility choices to the City of Temple.

GOAL

Safety First

Achieve a significant reduction in traffic fatalities and serious injuries for all modes on all public roads.

GOAL

Choices

Develop an integrated transportation network that provides improved mobility for all modes, including active transportation and space for emerging technologies.

GOAL

Connections

Develop a connected multimodal network providing accessible mobility options to serve the City across multiple modes and integrated with the surrounding land use.

GOAL

Prosperity

Strengthen the economic prosperity of the city by improving transportation systems that promote:

- + Access to jobs for all residents regardless of their income level, age or mobility status.
- + Reliability of the workforce for employers.
- + Mobility hubs and shipping logistics by providing efficient and reliable movement of goods by both rail and truck.

GOAL

Fund and Implement

Identify short- and long-term action steps while pursuing revenue resources to build, maintain, and operate new and existing transportation infrastructure and services.

GOAL

Community Driven

Partner with all community members and elevate the underrepresented voices to provide community based transportation solutions.

GOAL

Mobility

Provide a Multimodal Transportation System that safely takes people where they need/want to go, in a timely manner, with a perceived sense of comfort.

GOAL

Maintain and Sustain

Promote stewardship of a sustainable transportation system through strategic asset management and systems preservation.

GOAL

Quality of Place

Promote place making through development of context sensitive complete streets design elements.
