

Hwy. 107 – Lybrand Dr. (Jacksonville-Cato Rd) (Sherwood) (S)

Sherwood, Arkansas

What Is the Jacksonville–Cato Road Improvements Project?

The purpose of this project is to improve approximately .86 miles of Jacksonville-Cato Road between Highway 107 and Lybrand Drive in Sherwood, Arkansas. The proposed project improvements for Jacksonville-Cato Road include elevating the roadway and providing pedestrian and bicycle accommodations. Specifically, the plan involves improving the existing roadway to include two, 11-foot travel lanes, and one center turn lane. Additional features include a 14-foot multi-use path on the south side, a roundabout at Creekdale Drive, and an underpass that will be constructed at Duncan Creek, near Creekdale Drive.

Why Are We Meeting Today?

The purpose of this meeting is to gather input on the proposed plans to improve Jacksonville – Cato Road between Highway 107 and Lybrand Drive in Sherwood, Arkansas. This “open house” public involvement meeting will display the proposed project, and the public will have an opportunity to view exhibits, ask questions, and offer comments. No formal presentations will be given. The City of Sherwood and Metroplan are here to answer questions and provide information.

What Happens After This Meeting?

The City of Sherwood and Metroplan invite interested individuals and entities to provide comments on the proposed plan. The public comment period begins March 25, 2025, and will extend until April 9, 2025. Personally identifiable information provided by individuals submitting public comments may be published.

Comments received during the comment period (March 25 – April 9) will be reviewed and considered in future design refinements. Roadway design will continue to be refined by addressing agency comments received on 90% design. Environmental studies will proceed to determine whether no significant impacts would result from the project. Once ARDOT and FHWA approve the environmental documentation, the proposed project would be cleared for construction. Utility relocations are anticipated to begin in 2025 after environmental clearance is received.

Construction is anticipated to begin in the second half of 2025 or early 2026 and continue for approximately 15 months.
