

Scenario Analysis

Transit

Scenario Description: Utilize data from the comprehensive system assessment and input from the public and stakeholders to assess the existing transit service and evaluate market coverage area.

Outcome: Coverage area benefits and planning level cost for each Alternative.

Next Steps: Carry forward recommendations into the Transit Vision Plan.

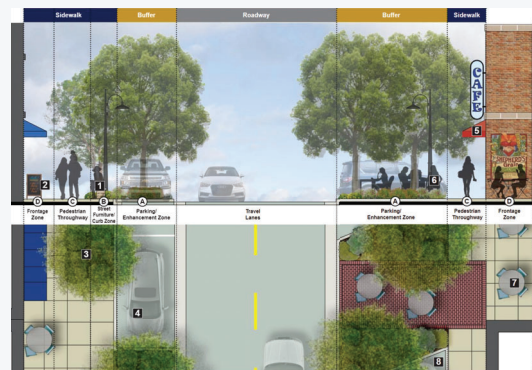

Active Transportation

Scenario Description: Analysis of facilities / infrastructure and national research/best practices for benefits to character, quality of place and equity of the community.

Outcome: Coverage benefits and bicycle and pedestrian improvement recommendations.

Next Steps: Carry forward recommendations into the Active Transportation Plan.

Emerging Technology

Scenario Description: Potential impacts (curbside management, parking restrictions/access, delivery) on the transportation network, the City, and the region based on new policy or program recommendations for car sharing, bike sharing or scooter programs.

Outcome: Identify recommended policies/programs for the study area.

Next Steps: Provide recommendations on how to maintain.
